

AOC

Workplace Display Solutions

AOC is a global leader in monitor display technology, backed by over 60 years of design and manufacturing experience. AOC has earned a reputation for selling user-friendly, technologically advanced displays that provide exceptional value for every type of organisation.

Our workplace monitors have these practical features:

- 3 Years Warranty across Australia and New Zealand.
- Analogue and Digital Inputs to connect to every PC.
- Dynamic Colour Boost System (DCB) for vivid colour.
- Dynamic Contrast Ratio (DCR) for impressive clarity.
- Fast Response Time for smooth moving images.
- Environmentally-friendly manufacture and disposal: RoHS restricts the use of hazardous substances.
- Reduced power consumption saves energy costs: Energy Star, TCO and/or EPEAT compliance.

Selected models come with a 4-way adjustable stand (also available as a separate addition for most other LCD monitors). Aside from swivel and tilt alignments, this enables further ergonomic improvements:

- Height Adjustment (110mm range) to suit different people and workstation characteristics.
- Pivot (90°) to view full A4 documents at substantially larger size, easing eyestrain and limiting scrolling.

In line with industry trends, AOC offers widescreen monitors that can significantly increase productivity for multitasking workers, along with advanced IPS-panel models that give graphic design professionals superior colour accuracy. Traditional "square" (4:3) screens can still suit some legacy applications and smaller spaces; AOC continues to offer quality models in this category.
